

DOMOCLICK®

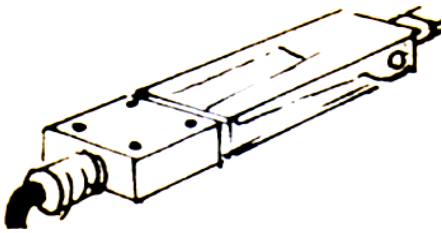

DOMOCLICK® Connectors are a fast and efficient means of terminating and interconnecting the range of self-limiting heating tapes for frost protection process and hot water maintaining.

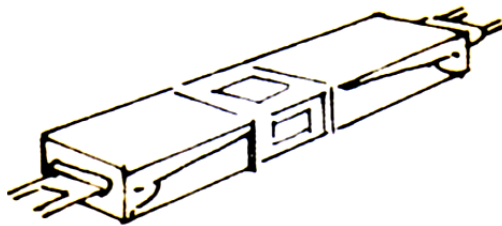

No special tools or hot air guns are required to complete the termination, which can be completed in minutes. Insulation piercing contacts complete the electrical contact when the **DOMOCLICK®** is closed.

DOMOCLICK® connectors can be wall or pipe mounted and can be fitted either in or out of the insulation

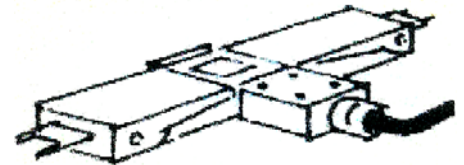

RANGE

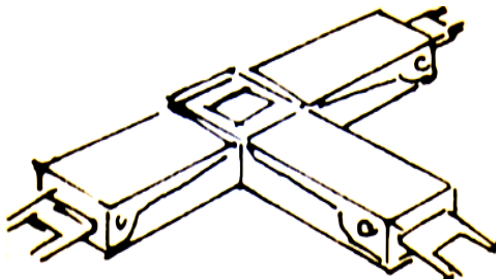

DHB 100
Incoming power supply to heating tape.

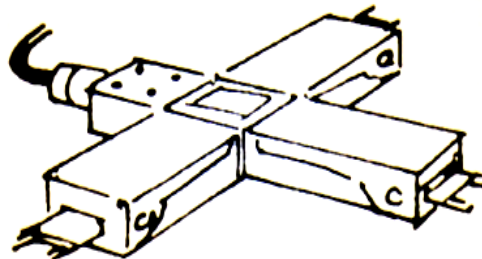

DHB 101
Series connection for two heating tapes.

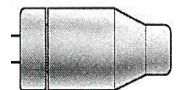

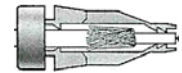

DHB 102
Incoming supply to series connected heating tapes.

DHB 103
'T' connection for three heating tapes.

DHB 104
Incoming power supply to 'T' connection

DHB 400
Gel filled end seal
